

slist_t

next

The diagram illustrates a linked list structure. A pointer variable, labeled **slist_t**, is shown at the top. A horizontal arrow points from the left edge of the **slist_t** box to the left side of a green rectangular node. Inside this green node, the word **next** is written, representing the pointer to the subsequent node in the list. A horizontal line extends from the right side of the green node, indicating the continuation of the list.
